

Innovative Quality Built Trailers Delivered On Time!

Belco Multi Roller Fully Galvanized Trailers

Feature a separate under carriage & A-Frame design with fully adjustable arms. This Feature is strong and allows for easy adjustment to point of balance.

Load Sharing Suspension is Standard.

We believe that if you require a tandem trailer then why compromise and have slipper slipper suspension. It does not spread the load over both axles like load share suspension. Load Share also provides a smoother ride for your boat and also enables ease of manoeuvring.

The Belco Multi Roller Trailers

Come with Override or Electric Brakes, LED Trailer Lights, Alloy Wheels and Swing Away Jockey Wheel.

Spare Wheel & Spare Wheel Carrier, Bearing Buddies , Surf Bar Extensions and Electric Winch are also available on request.
