The Sea Jay Magnum Xpack 2 was built on the foundation of our Magnum 2 range, our Xpack 2 series comes standard with additional features that further enhance the usability of these models. Wide side decks have been fitted for greater strength but also to allow for rod holders to be fitted with ease.

A large rear step and rail has also been added - a must when pushing off the banks after fishing for yabbies. Front handles have been replaced with rails and rails at the rear. The anchor well is also fitted up the front for easy anchoring. Tank Rack and Battery Rack and the part floor makes moving around the boat a breeze. Two small side pockets are great for all those small items we need while fishing.

A Minn Kota plate can be added to the front deck for the use of an electric outboard. Check out our Minn Kota Range.
Our Sales team are on standby to take your call during the week and Thursday Nights up to 7:30pm or call in for their expert advice and we will take you through the Magnum Range of Sea Jay Boats.
