Yamaha F90HP Four Stroke Mid-Range Outboards for Sale

Yamaha F90 Outboard Motor – More Power, Less Weight, Better Efficiency

The **Yamaha F90 Outboard Motor** represents the next evolution in Yamaha's midrange outboard lineup—delivering **exceptional power, improved fuel efficiency, and reduced weight** in a refined, modern design.

Built for serious boating performance, the F90 offers class-leading torque and rapid acceleration, making it an ideal choice for boats rated up to 90HP. Whether you're fishing offshore, cruising the coast, or taking the family out for the weekend, this engine delivers smooth, reliable performance every time.

Advanced 1.8L Four-Cylinder Engineering

At the heart of the Yamaha F90 is a **1.8L four-cylinder marine engine**, engineered for strength, efficiency, and durability:

- 16-valve SOHC (Single Overhead Camshaft) design
- Four valves per cylinder for improved airflow and combustion
- Increased displacement (1.8L) over previous 1.5L models
- Stronger torque curve for faster planing and acceleration
- Up to 10% improved fuel economy over earlier generations
- Optimised combustion system for cleaner, more efficient running
-

Smooth, Quiet & Comfortable Performance

The F90 is designed to enhance every moment on the water:

- Reduced fuel consumption for longer range trips
- Redesigned muffler system for quieter operation
- Intake silencer for low-noise cruising
- Improved engine rigidity to minimise vibration
- Smooth, refined performance ideal for fishing and family boating
-

Available in signature Yamaha Gray and Pearlescent White—F90 Yamaha Options:

- F90LB - Electric Start, Tilt System - Transom height - Long—Forward Control Box with T&T
- F90XB- Electric Start, Tilt System - Transom height - Extra Long—Forward Control Box with T&T
