F15HP

The Yamaha F15HP delivers serious on-water performance in a portable, easy-to-handle design. Powered by a 362cc two-cylinder, four-stroke engine, it offers smooth acceleration, strong torque, and excellent fuel efficiency—making it one of the most capable engines in the portable outboard class.

Built for reliability in all conditions, the F15HP is equipped with Yamaha's PrimeStart™ system for easy, dependable starting. Manual start models also feature auto-decompression to make pull-starting simpler and smoother in any environment.

Designed for versatility, the F15HP includes a shallow water drive system for safer operation in low depths and a high-output 10-amp alternator to keep onboard electronics powered when you need them most.

Features & Benefits
