F20HP

The Yamaha F20 EFI is a major step forward in portable outboard performance, bringing advanced Yamaha technology from larger engines into a compact, highly capable 20hp platform. Built on the same award-winning design as the F25, it delivers exceptional power, fuel efficiency, and reliability for serious boating applications.
With both battery and battery-less Electronic Fuel Injection (EFI) options, the F20 provides improved starting, smoother operation, and better fuel economy across all conditions. It's designed for boaters who want maximum performance from a portable package without compromising efficiency or control.
Additional innovations include variable trolling control for precise low-speed handling, increased displacement (432cc), and a high-output 16-amp alternator—delivering a 60% increase in output to support modern electronics and onboard systems.

Features & Benefits

- Advanced Yamaha EFI system (battery or battery-less options)
- Increased 432cc displacement for strong performance
- Excellent fuel efficiency and smooth power delivery
- Variable trolling control for precise low-speed operation
- High-output 16-amp alternator (60% increased output)
- Easy starting and reliable operation in all conditions
- Manual or electric start options available
- Manual or power tilt configurations (model dependent)
- Multi-function tiller handle or control box options
- Freshwater flush system for easier maintenance
- Durable alloy propeller
- Strong torque for aluminium boats, tenders, and inflatables

Available Models

Manual Start

- F20SMHB – Short Shaft
- F20LMHB – Long Shaft

Electric Start (Multi-Function Tiller / Trim & Tilt)

- F20SWPB – Short Shaft
- F20LWPB – Long Shaft

Why Choose Watson's Marine?

Proudly based in Gympie, Watson's Marine supplies quality Yamaha outboards backed by expert advice, trusted service, and local support you can rely on.
