Yamaha F425 / F450HP Four Stroke Offshore Outboards for Sale

The Ultimate Expression of Offshore Power
For those who demand the very best from their vessel, there is the **Yamaha XTO Offshore 450**.
Combining a commanding 5.6L V8 platform with Yamaha's most advanced marine technologies, the XTO 450 represents the pinnacle of offshore outboard engineering—created for discerning owners who expect exceptional performance, effortless control, and uncompromising reliability.
Whether powering a premium centre console, luxury sportfisher, or large offshore cruiser, the XTO 450 delivers confidence far beyond the horizon.

Built Without Compromise
The Yamaha XTO Offshore 450 was engineered to redefine what is possible from a high-horsepower outboard. Every aspect of its design has been developed to deliver extraordinary torque, refined power delivery, and seamless integration with today's most sophisticated offshore vessels. For owners venturing further offshore, carrying heavier loads, and demanding complete confidence in all conditions, the XTO 450 stands in a class of its own.

Key Highlights

- 450HP Flagship Performance
- 5.6L Naturally Aspirated V8
- Exceptional Torque and Acceleration
- Purpose-Built for Premium Offshore Applications

Engineered for Multi-Engine Installations

Designed for the Modern Offshore Lifestyle
Today's premium offshore vessels rely on sophisticated onboard systems, and the XTO 450 is designed to support them.
Its high-output charging system delivers exceptional electrical performance, even at lower engine speeds,
helping power the systems modern boat owners depend on.

Command at Your Fingertips
True luxury on the water is not simply about power—it's about control.
The XTO Offshore 450 integrates effortlessly with advanced helm systems, delivering precise steering response, smooth throttle operation, and intuitive vessel handling.
From navigating crowded marinas to holding position over offshore structure, every movement feels deliberate, refined, and predictable.

Advanced Control Features

- Integrated Electric Steering
- Joystick Compatibility
- Advanced Autopilot Integration
- Precision Vessel Control

Smooth Digital Electronic Control
Because confidence should never be optional.

Supports High-Demand Systems Including:

- Gyro Stabilisation
- Climate Control and Air Conditioning
- Advanced Navigation Electronics
- High-Performance Sonar Systems

Premium Marine Entertainment Systems
Engineered for the way premium boats are used today.

Designed for the Modern Offshore Lifestyle
Today's premium offshore vessels rely on sophisticated onboard systems, and the XTO 450 is designed to support them. Its high-output charging system delivers exceptional electrical performance, even at lower engine speeds, helping power the systems modern boat owners depend on sophistication, and purpose.
